

# Ben and Marie Muldoon

## Developing and Deploying Deaf Disciples

Training men in the local church  
to reach the silent world.

January, 2021

Announcing **baby Muldoon**,  
scheduled to arrive in late  
May! Thank you for your  
prayers as we anticipate the  
newest member of our team.

Marie has experienced minimal nausea and the  
little girl appears to be growing and healthy. We  
certainly appreciate your *prayers for a safe  
pregnancy and delivery.*

Our **deputation travels**  
took us through **Alaska**  
**(picture on left)**, Georgia,  
and Alabama in November  
and December. Next stop:  
North East.

We have had the privilege of **impacting  
several young people** in regards to  
missions, Deaf missions, or their personal  
walk with God. Some ask for advice on a  
more consistent basis, and others we have  
encouraged while at their  
church. *Your prayers for  
wisdom* are appreciated  
as we invest in young people  
across the country.

Our **deputation/furlough schedule** is  
busy! We are humbled by many churches'  
enthusiasm to schedule us despite uncertain  
times. We are receiving 43% of our needed  
support!

Many of you have asked how **COVID** has  
affected deputation. It seems that churches in  
the New England area have especially tight  
regulations, but pastors have still worked  
hard to accommodate us if possible. Most  
churches have been back to at least partial  
capacity and excited to have missionaries in. We  
have tried to be prudent and have not been sick  
with the virus so far. Thank you for praying!

Another popular question has been in regards  
to our **deputation timeline**. Lord willing, we'd  
like to at least visit Romania this September, but  
it's a little too early to know for sure if European  
borders will be open and our financial support  
will be sufficient. *Please pray God leads through  
the many unknowns this year holds.*

### Did you know?

Cars were originally built with wheels  
outside the frame.

It was a Romanian who first patented  
the idea of the wheels inside the car  
frame (in Germany, 1924), making cars  
more aerodynamic.
